Vijay Vimalananda Guru

has successfully completed the online Specialization

Generative AI for Mobile App Developers

After completing this specialization, you'll have essential skills in AI concepts, AI integration in software development, and using AI tools for mobile app development. You will be proficient in generative AI, including text, image, and code generation, as well as prompt engineering for optimizing tools like ChatGPT. You will have mastered the design and architecture of software using genAI, the creation of static websites and prototypes using genAI, and how to leverage genAI tools for app design, marketing, and support. You will also understand advanced concepts such as machine learning, embedded AI, and cloud-based mobile app development. These job-ready skills are in demand for roles in software development, genAI integration, and mobile app development.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
